Employment Conference, 3-5 April 2008

The Argument

- NREGA different from other employment schemes
- Universal, demand driven
- Expect needy- poor, landless, agri labour- to come
- Need not happen
- Employment within an employee- employer relation, within family, community setting
- Especially, women's work – low work participation rates

The Dataset

- Unique dataset- complete survey of GP
- Characteristics of social groups
- Select NREGA beneficiaries from the work register
- Register incomplete, so copy from job cards at work sites
- Identified in the baseline
- Some interviewed

Findings

- ‘Needy’ do not come; ‘Never worked outside’ come- why?
 - ‘Needy’, especially Paniya hesitant to work alongside
 - Delayed Payment is a further problem
- Forward caste women have begun coming
 - Prevented by husband/ son initially
 - Initial apprehension gone
 - Government work; group work
 - Lump sum at the end- lot of confidence

Conclusions

- Labourers not a homogeneous mass
- Work within family, community, employee-employer relations
- Lot of Paniya do not come
 - Reduction of social distance is a problem
- Lot of forward Caste women come
 - Reduction of social distance a boon
 - Govt work
- A Social transformation in the making
